

## WAVE User Maintenance Activity Notification Authorization

Your credit union has authorized individuals to perform WAVE User Maintenance, giving them authority to add, change, and delete WAVE user access for other WAVE users at the credit union. As an audit control tool, WesCorp will provide a WAVE Account Action Notice, via e-mail, to the individual you designate below. WesCorp recommends that notices be sent to an individual who is not authorized to perform WAVE User Maintenance, preferably someone from your senior management, compliance, or internal audit department. The WAVE Account Action Notice allows you to monitor access levels for WAVE users and provides an audit trail of User Maintenance activity.
